

Inlays & Labels - Non Metal

EFFICIENTLY TAG LARGE QUANTITIES OF NON-METALLIC ASSETS TO ENABLE POWERFUL RFID APPLICATIONS

- **Effortless integration** - Simply apply tags to any print media, packaging or non-metal assets.
- **Ready adoption** - Interoperable with NFC Forum and RAIN UHF RFID compliant devices.
- **Enhanced effectiveness** - Faster, more accurate than QR-codes or text transactions.

HID Global Inlays & Labels are small, thin self-adhesive tags that allow discreet or overt placement. They are easily hidden behind a poster or display, or inside a product housing or package; or they may be imprinted with high-visibility graphics, attracting the attention of people with smartphones or other standard RFID readers.

Promotional marketers use Inlays & Labels to quickly and cost-effectively integrate digital touch points into physical media, such as posters, packaging, point-of-purchase displays, and magazines. With Inlays & Labels in place, smartphone-wielding customers can interact in real time with your brand. Wireless technology enables effortless transactions, engaging improved customer participation and satisfaction.

NFC technology has enabled the convergence of social media, localized promotional efforts and mobile technology, empowering marketers with unprecedented tools to promote products and services while rewarding customer loyalty. Integrate the benefits of social-local-mobile (SoLoMo) technology to empower your customer conversations.

For industrial applications, HF and UHF Inlays & Labels enhance the speed and accuracy of inventory and process management systems. Using RAIN® RFID technology, each labeled asset can be identified in the supply chain or connected via Internet of Things (IoT), enabling businesses and consumers to identify, locate, authenticate and engage each item. Printable labels for on-metal use are described in a separate datasheet.

HID Global guarantees each individual RFID Inlay & Label tag will perform to specifications. Our quality assurance streamlines processing and encoding to keep your projects on time and on budget.

For high-security applications, innovative HID Trusted Tag® Services combines cryptographically secure NFC Inlays & Labels with a cloud-based authentication platform, powering frictionless, secure transactions for proof-of-presence, sweepstakes or product authentication. Options include a tamper-evident label to detect whether a product has been opened.

Ask your HID representative to demonstrate the potential of HID Trusted Tag Services.

TECHNOLOGY HIGHLIGHTS:

- Standards compliant options
 - NFC Forum Tag Type 2, 4 or 5
 - RAIN UHF RFID
- Label reels may be programmed and printed using standard equipment
- Each tag guaranteed to work
- Available also with HID Trusted Tag® Technology for added security versions for on- or off-metal use
